Professional Summary

Senior Analyst (Business Intelligence) with 2+ years of experience at HCLTech delivering data-driven insights through advanced analytics, SQL optimization, and automated reporting solutions. Skilled in designing scalable dashboards, ETL pipelines, and business intelligence systems that improve decision-making, efficiency, and operational performance.

Core Skills

Programming: Python, SQL

BI & Analytics: Power BI, Advanced Excel, Data Visualization, KPI Dashboards

Data Engineering: ETL Pipelines, Data Modeling, Data Validation, Automation

Tools: REST APIs, Git

Competencies: Business Intelligence, Stakeholder Management, Root Cause Analysis, Process Optimization

Professional Experience

HCLTech — Analyst (Business Intelligence)

- Designed and developed Power BI dashboards enabling real-time business insights and decision-making
- Automated reporting workflows using Python and SQL, reducing manual effort by 40%
- Optimized SQL queries and data pipelines, improving performance and reducing processing time by 30%
- Implemented data validation frameworks achieving 99.9% data accuracy and reliability
- Collaborated with stakeholders to gather requirements and deliver actionable insights

HCLTech — Graduate Trainee

- Processed and transformed 100K+ monthly records for reporting and analytics
- Developed KPI dashboards and automated reporting solutions
- Conducted root cause analysis to improve operational efficiency by 25%

RhythmFlows — Software Engineer Intern

- Built ETL pipelines and optimized SQL queries improving data retrieval by 50%
- Developed REST APIs and automation tools to enhance reporting systems

Key Projects

Enterprise Reporting Dashboard

- Developed end-to-end Power BI dashboard integrating multiple data sources
- Enabled real-time tracking of KPIs and business performance metrics

Data Pipeline Optimization

- Reduced ETL processing time from 4 hours to 90 minutes using optimized workflows
- Improved data reliability and reduced manual intervention
