PROFILE SUMMARY

Analytical and customer-focused Analyst with hands-on experience at HCLTech in technical troubleshooting, SQL optimization, and system performance improvement. Skilled in Python, SQL, and distributed systems, with a strong foundation in database technologies and application support. Adept at identifying root causes through logs, error traces, and performance metrics, collaborating with engineering teams to deliver reliable, high-quality solutions. Passionate about problem-solving, customer satisfaction, and continuously learning new technologies such as graph databases, cloud deployment, and containerization.

WORK EXPERIENCE

HCLTech — Analyst

March 2024 – Present | Noida, India

- Provided end-to-end technical support for enterprise-level systems, ensuring high availability and performance across multiple environments.
- Troubleshot complex SQL query and performance issues using logs, error traces, and monitoring tools to optimize database performance.
- Worked with cross-functional teams (Engineering, Product, and Customer Success) to resolve application and deployment issues efficiently.
- Automated data validation and report generation workflows using Python, improving accuracy and reducing manual effort.
- Supported applications deployed on cloud and Linux environments, ensuring reliability, stability, and minimal downtime.
- Collaborated with customers and internal teams to provide technical guidance and maintain strong relationships.

Rhythmflows Solutions — Trainee Software Engineer (Intern)

Oct 2023 – Feb 2024 | Pune, India

- Developed RESTful APIs and integrated frontend systems using React.js and Django for seamless client interaction.
- Optimized backend data queries and analyzed logs to reduce response time and enhance performance by 50%.
- Assisted in debugging distributed services and participated in agile sprint planning to ensure timely delivery.
- Gained experience in data modeling, API testing, and version control with Git-based workflows.

PROJECTS

System Monitoring and Automation Tool — Python, SQL, Linux

Developed an internal script to monitor database performance, parse log files, and automatically alert anomalies, reducing manual troubleshooting efforts.

Google Store Clone — React, Django, PostgreSQL

Built a responsive e-commerce platform with secure APIs for product management and real-time inventory updates.

EDUCATION

Master of Computer Applications — Savitribai Phule Pune University (2022 – 2024) — 8.63 CGPA

Bachelor of Computer Applications — Solapur University (2019 – 2022) — 9.57 CGPA

CERTIFICATIONS

- Career Skills in Software Development — LinkedIn Learning
- Introduction to Artificial Intelligence — LinkedIn Learning
- Natural Language Processing with Python — Udemy

SKILLS

Technical Support & Debugging: Log Analysis, Error Trace Investigation, SQL Optimization, System Monitoring

Programming: Python, Java, SQL, JavaScript

Database Technologies: PostgreSQL, MongoDB, NoSQL

DevOps & Cloud: Linux, Docker, Kubernetes, AWS, GCP (basic exposure)

Frameworks: Django, Flask, React.js

Tools & Processes: Git, Agile, REST APIs, Performance Tuning, Customer Communication
