The Hiring Manager

UBS Group AG

Mumbai, India

**\*\*Subject:\*\* Application for Data Scientist (NLP) – Job Ref: 326628BR**

Dear Hiring Manager,

I am writing to express my keen interest in the **Data Scientist (NLP)** position (Job Ref: 326628BR) at **UBS**. As an **Analyst at HCLTech** with hands-on experience in building intelligent data-driven systems, I have developed a strong foundation in **Machine Learning, Natural Language Processing, and Large Language Models (LLMs)** that aligns closely with the goals of UBS's Data Analytics Foundational Platform team.

At HCLTech, I have contributed to the design and development of scalable backend solutions, implemented NLP-based features, and worked with structured and unstructured datasets to generate insights. My recent AI projects — **NotebookLM / PDF-Chat** and **TechAssist AI Chatbot** — involved building LLM-powered conversational systems using **LangChain, OpenAI APIs, and PyTorch**, focusing on retrieval-augmented generation and context-aware search. These experiences have strengthened my ability to apply advanced language models to solve real-world business challenges.

I am particularly drawn to UBS's mission of combining **data science with financial innovation** and its commitment to deploying AI responsibly across global platforms. I am confident that my technical skills, combined with a strong analytical mindset and collaborative spirit, would make me a valuable addition to your Data Science team.

Thank you for considering my application. I look forward to the opportunity to discuss how I can contribute to UBS's vision of building data-driven intelligence within its Wealth Management division.

Warm regards,

**Mayur Gatti**
