Professional Summary

Results-driven Data Analyst with strong expertise in **Python, SQL, and Database Optimization**. Currently delivering scalable data solutions at HCLTech, with a focus on efficient data handling and performance tuning. Proven track record of reducing query retrieval times by **50%** through advanced SQL optimization. Skilled in translating complex functional requirements into analytical solutions, leveraging NLP and predictive modeling to drive business value.

Technical Skills

- Data Analysis & Languages:** Python (Pandas, NumPy), SQL, R, Data Analysis.
- Databases:** PostgreSQL, MySQL, MongoDB.
- BI & Tools:** Excel (Advanced), Git, Linux, Agile Methodologies.
- Advanced Tech:** Natural Language Processing (NLP), REST APIs, Django (Data Modeling).

Professional Experience

HCLTech

Noida, India

Data Analyst

March 2024–Present

- Optimized high-volume **SQL queries** and database schemas, enhancing application data retrieval speeds and overall scalability.
- Translated complex functional requirements into efficient backend data architectures using **Python and Django**.
- Managed data handling processes to ensure **99.9%** data integrity and consistent performance across scalable applications.
- Collaborated with cross-functional product teams to analyze performance metrics and implement data-driven optimizations.
- Streamlined backend data flows, ensuring on-time delivery of high-performance modules within Agile sprint cycles.

Rhythmflows Solutions

Pune, India

Trainee Software Engineer (Intern)

Oct 2023–Feb 2024

- Performed rigorous **SQL query optimization**, successfully reducing data retrieval latency by **50%**.
- Designed and implemented RESTful APIs to handle dynamic data exchange between servers and user interfaces.
- Conducted performance tuning and testing on large datasets to ensure system reliability and scalability.
- Utilized Git-based workflows for version control, ensuring efficient collaboration on code and data scripts.

Key Projects

Academic Project

Metro Ticket Reservation System (NLP)

2024

- Developed a predictive booking system using **Python (Flask)** and **MongoDB**, integrating **NLP** algorithms for route prediction.
- Analyzed user input patterns to optimize route suggestions, reducing overall booking time for users by **30%**.

Academic Project

- Google Store Clone (E-commerce Data)*2023
- Designed a relational database schema using **PostgreSQL** to manage product inventory, user data, and order history.
 - Implemented secure API integrations for real-time data filtering and product browsing.

Education

- Savitribai Phule Pune University****Pune**
- Master of Computer Applications (MCA), CGPA: 8.63*2022–2024
- Solapur University****Solapur**
- Bachelor of Computer Applications (BCA), CGPA: 9.57*2019–2022

Certifications

- Udemy**
- Natural Language Processing with Python*
- LinkedIn Learning**
- Introduction to Artificial Intelligence*
- LinkedIn Learning**
- Career Skills in Software Development*
