WORK EXPERIENCE

HCLTech – Analyst (L1 Support) Noida, India | March 2024 – Present

- Provide L1 application and technical support to global users by handling incidents, service requests, access management, and troubleshooting across Windows, Active Directory, MS Teams, and enterprise apps.
- Perform initial diagnosis, resolve common issues (password resets, account lockouts, MFA/SSO, VPN, browser/system errors), and escalate complex cases to L2/L3 teams with detailed notes.
- Use ServiceNow/ITSM to log, track, and close tickets within SLA, ensuring high-quality responses.
- Conduct root-cause analysis for recurring issues and create knowledge articles to increase FCR.
- Execute user provisioning, deprovisioning, and access updates following security/compliance policies.
- Support users with Outlook/Teams/O365, system performance issues, and application troubleshooting.
- Collaborate with infra and application teams to triage failures, analyze logs, and restore service availability.
- Maintain strong stakeholder communication, ensuring high CSAT and adherence to SOPs.
- Learn backend logs, APIs, and data flow to improve triaging efficiency and reduce unnecessary escalations.

Rhythmflows Solutions – Trainee Engineer (Data & Backend) Pune, India | Oct 2023 – Feb 2024

- Developed and optimized SQL queries for backend retrieval, reducing processing time by 50%.
- Built data integration scripts in Python and worked with data lake concepts and raw data processing.
- Worked in Agile environment and contributed to backend data model design.

PROJECTS

Metro Ticket Reservation System | Python, Flask, MongoDB

- Created a Python-based pipeline to process user inputs and automate route predictions.
- Implemented validation checks and designed scalable schemas for transaction logs.

Google Store Clone | Django, PostgreSQL

- Designed normalized relational schema for product/user data.
- Implemented efficient data fetch logic and indexing for large datasets.

SKILLS

- Data Engineering: Pipelines, ETL, Warehousing, Data Lake Architecture.
- Tech: Python, SQL, PostgreSQL, MongoDB.
- Tools: Git, Linux, VS Code, CI/CD.
- Soft Skills: Problem Solving, Ownership, Communication.

EDUCATION

MCA – SPPU (8.63 CGPA) | 2022–2024

BCA – Solapur University (9.57 CGPA) | 2019–2022

CERTIFICATIONS

• Software Development – LinkedIn Learning • Artificial Intelligence – LinkedIn Learning • NLP with Python – Udemy
