Profile

Motivated BCA final-year student with a growing skill set in Python and front-end development, seeking an entry-level role where I can contribute while continuously learning. I aim to apply my problem-solving abilities, strengthen my technical skills, and grow within a professional environment. Eager to adapt, learn new technologies, and deliver value to the organization.

- Attention to Detail

Projects

To-do Application

This application adds the tasks in your list and displays it to you. So that you will remember the tasks you have to do. This application adds task, updates tasks, and delete the tasks.

This application helps us to do all the work we have without forgetting them and before the deadline.

AI-Powered Resume Job-Fit Analyzer (PDF Reader)

A beginner-friendly Python tool that reads a PDF resume, extracts key skills, compares them with a job description, and generates a Job-Fit Score. It also highlights which skills match and which are missing. This project shows my ability to work with PDFs, text processing, and basic data analysis. It runs through the command line like a real professional tool and is useful for ATS-related tasks.

Certificates

Python Certification

Reliance Foundation Skilling Academy, Virtual

SQL Certification

Udemy

Achievements

In my second year of BCA. My college organized a coding competition. In that, I have got second rank.
