Noida, Uttar Pradesh, India

Professional Summary

AI/Data Engineer with 2+ years of experience designing data pipelines, automation workflows, and intelligent analytics systems at HCLTech. Experienced in Python, SQL, and building scalable data processing pipelines with REST APIs and automation frameworks. Strong interest in building LLM-powered tools, retrieval systems, and AI-driven workflows including prompt engineering, RAG architectures, and API-integrated AI pipelines. Focused on scalable, production-grade systems that enable data-driven decision making and intelligent automation.

Core Skills

Programming: Python, SQL

AI / ML & NLP: LLM Workflows, Prompt Engineering, RAG Concepts, Embeddings, AI APIs, NLP Basics

Data & Analytics: Power BI, Advanced Excel, ETL Pipelines, Data Modeling, Statistical Analysis

Tools & Frameworks: REST APIs, Git, Data Visualization, Automation Workflows

Concepts: Data Pipelines, Model Evaluation Concepts, Data Validation, Process Optimization

Professional Experience

HCLTech — Analyst | Sep 2025 – Present

- Built automated analytics pipelines using Python and SQL to process enterprise datasets and power decision dashboards
- Developed Power BI dashboards and data automation workflows reducing manual reporting by 40%
- Designed scalable ETL pipelines and optimized SQL queries improving processing efficiency by 30%
- Integrated REST APIs and automation scripts enabling real-time data ingestion and reporting pipelines
- Implemented data validation frameworks ensuring 99.9% reporting accuracy and reliability

HCLTech — Graduate Trainee | Mar 2024 – Aug 2025

- Processed and transformed 100K+ monthly records through automated ETL workflows
- Built KPI dashboards and automated reporting systems for operational analytics
- Conducted root cause analysis and incident data investigation reducing resolution time by 25%

RhythmFlows Solutions Pvt. Ltd. — Software Engineer Intern | Sep 2023 – Feb 2024

- Designed ETL pipelines and optimized SQL queries improving retrieval performance by 50%
- Developed RESTful APIs and backend automation tools improving system data accessibility
- Built internal tools for data processing, validation, and automated reporting

Key Projects

- **Automated Reporting Dashboard:** End-to-end analytics platform integrating Python, SQL and Power BI for real-time insights
- **Data Pipeline Optimization:** Reduced processing time from 4 hours to 90 minutes using optimized ETL and parallel workflows
- **AI Workflow Experiments:** Explored LLM APIs and prompt engineering techniques for automation and intelligent text analysis
- **Portfolio Website:** Built technical portfolio showcasing analytics, automation and engineering projects

Education

MCA, Savitribai Phule Pune University | 2022 – 2024

BCA, Punyashlok Ahilyadevi Holkar Solapur University | 2019 – 2022
